

TECHNICAL SPECIFICATION

Western Red Cedar

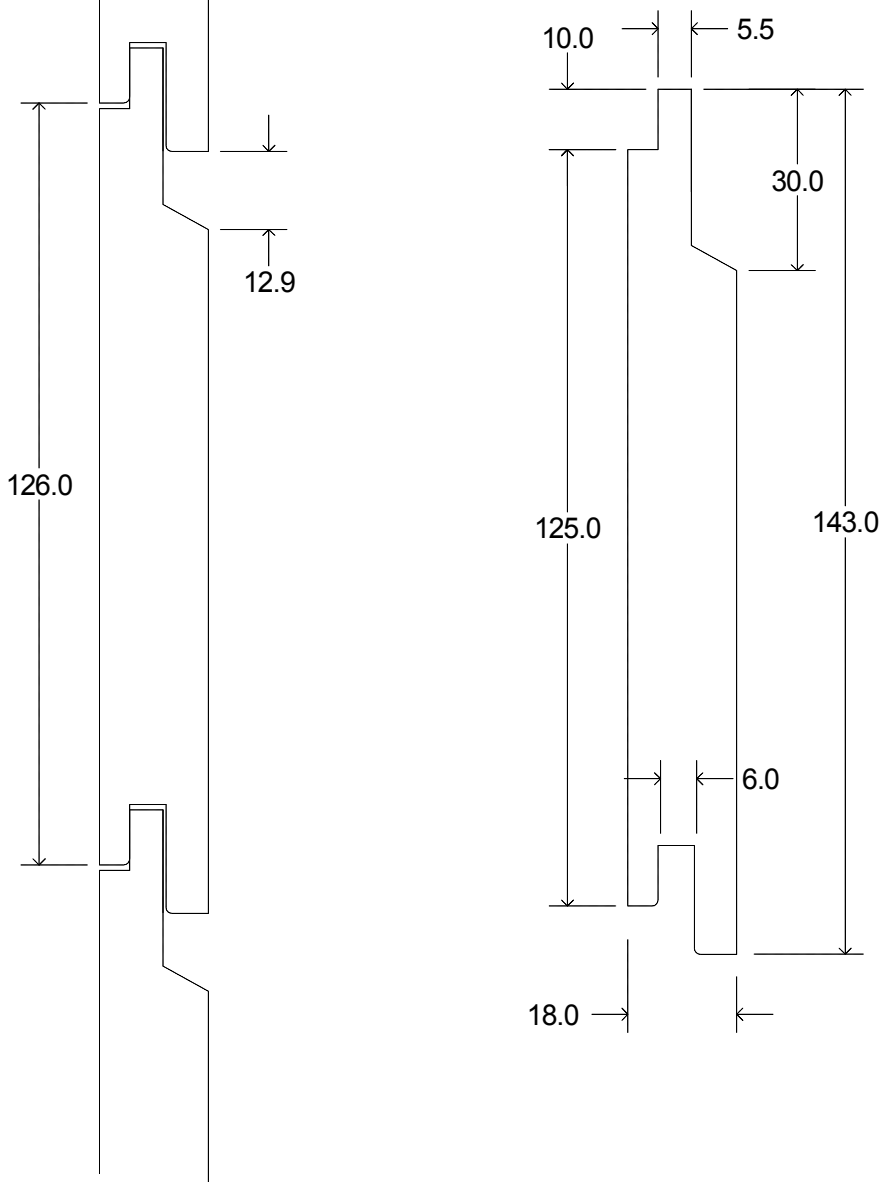

A superb cladding material, light in weight and ultra durable. Always a popular cladding material and one of our favourite timbers, Western Red Cedar can give you a high class finish to both ultra modern contemporary buildings and also buildings with a traditional look. By only importing a pure No2 Clear grade we are able to supply a high majority of boards with minimal knots and a great colour consistency. This really is the Thorogood difference. Please see below for examples of the type of mouldings available.

Thuja plicata
Density: 390Kg/M3
